Currency hedging

The following foreign currency exposure targets apply to international assets:

- International Fixed Interest – 100% hedged to New Zealand dollars.
- Australian Equities – unhedged. However, the underlying fund manager has the discretion to hedge the underlying fund back to New Zealand dollars.
- International Equities – 50% hedged to New Zealand dollars. However, we may aim to add value by tactically adjusting the strategic hedging level on international equities above or below the benchmark of 50% depending on our view of how the New Zealand dollar will perform.
