Fees and other charges

The fees charged are listed in section 5 (**What are the fees?**) of the Lifetime Master Trust product disclosure statement. Further information is set out below.

Performance fees

The Lifetime Active Growth Fund invests in the Milford Active Growth Fund which is a non-related underlying fund that charges a performance fee.

To estimate the performance fee for the Milford Active Growth Fund we have assumed that the fund will achieve its objective of 10% p.a.

The hurdle rate for the Milford Active Growth Fund is 10% p.a. (A 'hurdle rate' is the return that must be achieved before a performance fee applies).

Trading expenses

Each of the Funds offered by the Lifetime Master Trust are invested in one or more underlying funds managed by an underlying fund manager. The underlying fund managers may use tools such as buy/sell spreads to provide for trading expenses of the underlying fund.

The tools used by the underlying funds are:

- A swing pricing adjustment may apply to the unit price of the funds offered by Milford Funds Limited (**Milford**) and Kernel Wealth Limited (**Kernel**). Kernel will only charge swing pricing if the withdrawal made is large enough to be perceived as materially impacting other investors in the fund.

Underlying fund	Swing pricing adjustment
-----------------	--------------------------

Milford Active Growth Fund	0.10%
----------------------------	-------

Kernel NZ Commercial Property Fund	0.10% or less
------------------------------------	---------------

- Buy/sell spreads apply when buying and selling units in the funds offered by Mercer (N.Z.) Limited (Mercer):

These provisions for trading expenses, as well as indirect trading expenses, are reflected in the funds' unit prices.
